

B&T BEARING

A Division of JanTec

Safety Ratings & Compliance Features Overview

At B&T Bearing, safety and compliance aren't afterthoughts—they're built into every product we deliver. From OSHA-aligned Pop-Up Stops to sealed Ball Transfer Units and precision-engineered Conveyor Rollers, our components are designed to help your operation meet regulatory benchmarks without compromising performance.

Whether you're working in aviation MRO, warehousing, manufacturing, or logistics, our systems are tailored to keep your material handling process both efficient and inspection-ready. This flyer provides a quick look at the safety and compliance features you can expect from B&T Bearing products—and how they support your team's performance and peace of mind.

We Don't Just Meet Standards - We Help You Exceed Them.

POP-UP STOPS

- OSHA-aligned engagement height
- Smooth retract for zero interference
- Ideal for segmented line stops & modular layouts

BALL TRANSFER UNITS

- Sealed bearing options for contamination resistance
- Load-tested configurations (low to high weight)
- Stainless steel & corrosion-resistant materials

CONVEYOR ROLLERS

- Steel: High-load durability, long life cycle
- Poly: Quiet operation, chemical resistance
- Custom diameter & shaft types for system fit

WHY

It Matters

- Stay ahead of regulatory requirements
- Reduce incident risks
- Simplify maintenance planning
- Improve workflow accountability
